CLAIMS

What is claimed is:

1 2 3 4	bromide	A soil biocide formulation for aqueous application comprising in combination: an effective amount of a soil biocide selected from the group consisting of methyle, chloropicrin, 1-3 dichloropropene and methylisothiocyanate; and an emulsifier.
1 2		The biocide formulation as recited in claim 1, wherein said emulsifier comprises a non- infactant.
the state of the s		The biocide formulation as recited in claim 1, wherein said emulsifier comprises an surfactant.
	biocide	The biocide formulation as recited in claim 1, wherein said biocide is present in a range of approximately 50 to 99% by weight of the formulation; and wherein said emulsifier is present in a range of approximately 50 to 1% by weight of the formulation.
1 2	5.	The biocide formulation as recited in claim 4, wherein said emulsifier is comprised of nic and anionic surfactants.

range of approximately 80 to 95% by weight of the biocide formulation; and

The biocide formulation as recited in claim 1, wherein said soil biocide is present in the

- said emulsifier is present in the range of approximately 20 to 5% by weight of the biocide
- 4 formulation.
- 1 7. The biocide formulation as recited in claim 6, wherein said emulsifier is comprised of
- 2 non-ionic and anionic surfactants.
- 1 8. The biocide formulation as recited in claim 7, wherein the anionic surfactant is present in
- 2 an amount of from approximately 0.1 to 40% of the total weight of said surfactant, and wherein
- 3 the non-ionic surfactant is present in an amount of from approximately 60 to 99.9% of the total
- weight of said surfactant.

- 9. The biocide formulation as recited in claim 8, wherein the anionic surfactant is present in an amount of from approximately 0.1 to 30% of the total weight of said surfactant, and wherein the non-ionic surfactant is present in an amount of from approximately 70 to 99.9% of the total weight of said surfactant.
- F 10. A soil biocide formulation as for aqueous application comprising in combination:
- 2 a soil biocide selected from the group consisting of methyl bromide, chloropicrin, 1-3
- 3 dichloropropene and methylisothiocyanate, wherein the biocide is present in the range of
- 4 approximately 80 to 95% by weight of the biocide formulation; and an emulsifier in the range of
- 5 approximately 20 to 5% by weight of the biocide formulation, wherein the emulsifier is a non-
- 6 ionic surfactant.
- 1 11. A soil biocide formulation as for aqueous application comprising in combination:

- 1 12. The biocide formulation as recited in claim 1, wherein the emulsifier is selected from the
- 2 group consisting of nonylphenol ethoxylate, isopropyl amine dodecyl benzene sulfonate,
- 3 octylphenolethoxylate, isoheptyl ethoxylate, tridecyl ethoxylate, Castor Oil ethoxylate, calcium
- 4 dodecyl benzene sulfonate, and sodium dodecyl benzene sulfonate.
 - 13. The biocide formulation as recited in claim 1, wherein said biocide comprises 1,3 dichloropropene, having an application rate of the biocide of approximately 13-56 gal per acre.
 - 14. The biocide formulation as recited in claim 1, wherein said biocide comprises chloropicrin, having an application rate of the biocide of approximately 100-300 lbs per acre.
- 1 15. The biocide formulation as recited in claim 1, wherein said biocide comprises methyl
- 2 isothiocyanate, having an application rate of the biocide of approximately 7-100 lbs per acre.
- 1 16. The biocide formulation as recited in claim 1, wherein said biocide comprises methyl
- 2 bromide, having an application rate of the biocide of approximately 150-400 lbs per acre.
- 1 17. The biocide formulation as recited in claim 1, wherein said emulsifier is selected from the
- 2 group consisting of:

- nonylphenol ethoxylate in an amount varying from approximately 50 to 90%;
- 4 castor oil ethoxylate in an amount varying from approximately 10 to 40%;
- isopropyl amine dodecyl benzene sulfonate in an amount varying from approximately 0.1
- 6 to 10%; and

- 7 isopropyl alcohol in an amount varying from approximately 0.1 to 30% of the emulsifier.
- 1 18. A method for applying a soil biocide formulation to soil comprising:
- adding to an aqueous medium an effective amount of a soil biocide selected from the
- 3 group consisting of methyl bromide, chloropicrin, 1-3 dichloropropene and
- 4 methylisothiocyanate, and an emulsifier; and
- 5 applying the resulting mixture to the soil.
 - 19. The method as recited in claim 18, wherein said biocide is present in a range of approximately 50 to 99% by weight of the biocide formulation; and said emulsifier is present in a range of approximately 50 to 1% by weight of the biocide formulation.
 - 20. The method as recited in claim 18, wherein said emulsifier is comprised of non-ionic and anionic surfactants.
- 1 21. The method as recited in claim 18, wherein said biocide is present in said formulation in
- 2 the range of approximately 80 to 95% by weight; and said emulsifier is present in said
- 3 formulation in the range of approximately 20 to 5% by weight.

- The method as recited in claim 18, wherein said biocide is present in said formulation in 22. 1
- the preferred range of approximately 90-95% by weight; and said emulsifier is present in said 2
- formulation in the range of approximately 5-10% by weight. 3
- The method as recited in claim 20, wherein said anionic surfactant is present in said 23. 1
- surfactant in the range of approximately 0.1 to 40% by weight. 2
- The method as recited in claim 20, wherein the anionic surfactant is selected from the 1 24.
- group consisting of Isopropyl amine Dodecyl Benzene Sulfonate, Dodecyl Benzene Sulfonate, 2
- and Sodium Dodecyl Benzene Sulfonate.
 - The method as recited in claim 20, wherein the non-ionic surfactant is selected from the 25. group consisting of Tridecyl Ethoxylate, Castor Oil Ethoxylate, nonylphenol ethoxylate, Octyl phenol ethoxylate and Isoheptyl Ethoxylate.
- 3 to the state of The method as recited in claim 20, wherein said non-ionic surfactant is present in said 26. emulsifier in the range of approximately 70 to 100% by weight of the emulsifier.
- The method as recited in claim 18, wherein said biocide comprises 1,3 Dichloropropene, 27. 1
- having an application rate of approximately 13-56 gal per acre. 2
- The method as recited in claim 18, wherein said biocide comprises chloropicrin having an 28. 1
- application rate of approximately 100-300 lbs per acre. 2

- 1 29. The method as recited in claim 18, wherein said biocide comprises methylisothiocyanate
- 2 having an application rate of approximately 7-100 lbs. per acre.
- 1 30. The method as recited in claim 18, wherein said biocide comprises methyl bromide
- 2 having an application rate of approximately 150-400 lbs. per acre.
- 1 31. The method as recited in claim 18, wherein said emulsifier is comprised of:
- 2 nonphenol ethoxylate in an amount from approximately 50 to 90%;
- 3 castor oil ethoxylate in an amount from approximately 10 to 40%;
- 4 isopropyl amine dodecyl benzene sulfonate in an amount from approximately 0.1 to 10%;
- and

- isopropyl alcohol in an amount from approximately 0.1 to 30%.
- 32. A method for fumigating soil, said method comprising the steps of:
- adding to an aqueous medium an effective amount of a soil biocide selected from the group consisting of methyl bromide, chloropicrin, 1-3 dichloropropene and methylisothiocyanate, and an emulsifier; and
 - applying the resulting mixture to the soil in a drip irrigation system.
